Scatter Plot

A scatter plot showing the relationship between Average Temperature in Celsius (X-axis) and Average Humidity (Y-axis). The X-axis ranges from 10 to 40, and the Y-axis ranges from 50 to 110. The data points are represented by purple circles. The plot shows a general trend where humidity is higher at lower temperatures, peaking around 15-20°C, and then generally decreasing as temperature increases, though with significant local variability. There is a notable cluster of points between 25°C and 30°C with humidity values between 70 and 85.

The chart displays two data series over a 12-month period. The top series, 'Avg. Temperature', is shown in red and fluctuates between approximately 15°C and 26°C. The bottom series, 'Avg. Precip. Mm', is shown in blue and fluctuates between approximately 0.05 mm and 0.18 mm. The x-axis is labeled 'Month of Last Updated' and shows the years 2024, 2025, and 2026.

Month of Last Updated	Avg. Temperature (°C)	Avg. Precip. (mm)
2024-01-01	25.5	0.16
2024-02-01	26.0	0.17
2024-03-01	26.0	0.17
2024-04-01	25.5	0.17
2024-05-01	23.0	0.12
2024-06-01	19.0	0.10
2024-07-01	17.5	0.11
2024-08-01	17.5	0.10
2024-09-01	20.0	0.12
2024-10-01	22.0	0.14
2024-11-01	25.0	0.18
2024-12-01	24.0	0.14
2025-01-01	22.0	0.13
2025-02-01	19.0	0.12
2025-03-01	16.0	0.10
2025-04-01	15.0	0.08
2025-05-01	15.5	0.09

Country VS Temperature

A world map illustrating the distribution of temperature across different countries. The map uses a color scale where green represents cooler temperatures, yellow represents moderate temperatures, and orange/red represents warmer temperatures. The map shows a clear latitudinal trend: countries closer to the equator (tropical regions) are colored orange or red, indicating higher temperatures, while countries further from the equator (temperate and polar regions) are colored green or yellow, indicating lower temperatures. The map is credited to OpenStreetMap.
